

## YOU WANT TO MAKE CLIMATE-NEUTRAL TRANSPORTATION POSSIBLE?

Together with the founding partners Sunfire, Climeworks, Paul Wurth and Valinor, Norsk e-Fuel exists to make transportation renewable. Through the development of a unique hydrogen-based Power-to-Liquid production pathway, we substitute fossil crude oil by converting CO<sub>2</sub>, water and 100 % Norwegian renewable electricity into renewable fuel. Be part of the 21<sup>st</sup> centuries energy revolution and join us on our mission as

## LEGAL COUNSEL (M/F/D)

OSLO/DRESDEN/REMOTE | STARTING DATE 01.04.2021 | FULLTIME OR PART-TIME | 3 YEARS EXPERIENCE

### Your main tasks:

- | Main responsibility for in-house legal matters and result-oriented advice to management on legal issues relevant to the company
- | Comprehensive advice and assessment on issues with special focus on corporate, commercial and contract law, also in an international context
- | Accompanying, participating in, and managing transaction projects in all phases, such as due-diligence processes
- | Comprehensive contract drafting, negotiation and review in English in both Norwegian national and international law
- | Coordination of cooperation, communication and management of external law firms and legal departments
- | Internal contact person for all corporate departments in all legal matters of the company
- | Collaboration with legal departments of Norsk e-Fuel founding companies

### Your profile:

- | Fully qualified lawyer with focus on Norwegian law
- | Minimum 3 years of relevant professional experience in an international commercial law firm and/or legal department of a large company - preferably in the energy industry
- | Extensive experience in contract negotiation, review and drafting
- | Ability to act in highly dynamic and competitive market environments without losing focus on economic reasonability
- | Transaction experience on financing rounds
- | Strong and determined negotiation skills in English and Norwegian

- | Future-oriented personality with a dedication for renewable energy
- | Experience in early-stage company building beneficial

#### We offer:

- | The opportunity to fundamentally tackle climate change by decarbonizing hard-to-electrify industries
- | Working on the forefront of the exciting and upcoming PtL economy
- | Close collaboration with market and technology leaders in the field of Direct-Air-Capture, High-Temperature Electrolysis and Plant Building
- | Shaping the foundation of new departments and structures
- | Flexible, team-driven, and supportive atmosphere with colleagues in different locations
- | Working-space in Oslo- and Dresden-area with the possibility for remote work
- | The possibility of local or remote onboarding
- | Flexible working hours and 30 days of vacation
