

Join the Future of Fossil-Free Aviation

Communications & PR Associate

Location: Oslo, Norway or Dresden, Germany | Start Date: as soon as possible | full time | Experience: 3 years

At Norsk e-Fuel, we are driving the energy transition in aviation by converting CO₂ and water into synthetic fuels. Our ambition is to industrialize power-to-liquid production and replace fossil fuels in aviation; at scale and for the long term. Founded in 2019, we bring together leading technology innovators, engineers, and industrial partners. Together, we are building a new industry by developing e-SAF production facilities across the Nordics.

To strengthen our Communications team, we are looking for a **Communications & PR Associate** who is passionate about clear, strategic communication and engaging storytelling. In this role, you will help position Norsk e-Fuel as a trusted project developer by creating compelling content, supporting media relations, and strengthening our digital presence. You will also coordinate communications and engage with a wide range of stakeholders.

What You Will Do

As Communications & PR Associate at Norsk e-Fuel, you will work at the intersection of communications, public relations and content creation, helping to strengthen the company's visibility and credibility across different stakeholder groups:

- **Manage our digital presence**
Shape, maintain and create content for our website and social media channels, ensuring consistent communication, strong brand visibility and a credible market presence
- **Create impactful communication materials**
Develop press releases, articles, visual assets and other communication materials that translate complex topics into clear and engaging stories
- **Monitor brand perception**
Track media coverage and public perception, identify opportunities and risks, and help ensure consistent positioning across all external communication
- **Coordinate events and external activities**
Organize conferences, speaking engagements and other events, supporting their planning, execution and follow-up
- **Equip the team for effective communication**
Create templates, company presentations and communication guidelines that enable clear, consistent and professional communication
- **Support strategic communications**
Contribute to the development and execution of communication strategies that strengthen Norsk e-Fuel's visibility, credibility and market positioning

- **Coordinate and contribute to stakeholder communication**

Work closely with project teams to communicate milestones and developments in a timely, transparent and consistent way across different stakeholder groups

What We Offer

- Be part of a mission to de-fossilize aviation and contribute to mitigating climate change
- Work alongside top experts in project development, carbon capture, hydrogen production, and renewable energy
- Enjoy 30 days of vacation (6 weeks)
- Benefit from comprehensive personal and travel insurance, including family coverage (applicable when based in Norway)
- Take advantage of education and development options for professional growth
- Work in modern, collaborative office spaces in Oslo with subsidized lunches
- Enjoy the flexibility of remote work options
- Be part of a culture of trust that values creativity, innovation, and professional growth, where your work will directly shape our strategy and impact the climate
- Being an expert from day one is not expected; there is space for development and growth

Your Profile

- A degree in Communications, Public Relations, Marketing, Media or a related field
- Around three years of practical experience in corporate communications, public relations, content creation or a comparable role
- Excellent writing skills with the ability to translate technical and project-related topics into clear and engaging content
- Experience managing digital communication channels, including social media and websites
- Strong communication skills in English, both written and spoken, a Nordic language is an advantage
- A proactive, structured and hands-on way of working, with the ability to manage multiple priorities in a dynamic environment
- Curious, collaborative and comfortable working with interdisciplinary teams and technical experts
- Confident working independently while taking ownership of projects from idea to execution
